DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CAR 1.321© may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CAR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CAR 3.73(b).

2. Claims 28, 35 and 44 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 8 of prior U.S. Patent No. 6,330,625. Although the conflicting claims are not identical, they are not patentably distinct from each other because they recite means or steps that are substantially the same and that would have been obvious to one of ordinary skill in the art.

Art Unit: 2116

3. Claims 28, 35 and 44, essentially repeat all of the features listed in claims 1, 8 of U.S. Patent No. 6,330,625. With the exception that claims 28, 35 and 44 of the instant application recite a system and claims 1, 8 of U.S. Patent No. 6,330,625 recite a method.

4. Claims 29-34 are identical to claims 2-7 of U.S. Patent No. 6,330,625.

5. Claims 45, 51 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 8 of prior U.S. Patent No. 6,708,237. Although the conflicting claims are not identical, they are not patentably distinct from each other because they recite means or steps that are substantially the same and that would have been obvious to one of ordinary skill in the art.

5. Claim 45, essentially repeats all of the features listed in claim 1 of U.S. Patent No. 6,708,237. With the exception that claim 45 of the instant application recites a system and claim 1 of U.S. Patent No. 6,330,625 recites a method.

6. Claims 46-50 are identical to claims 2-6 of U.S. Patent No. 6,708,237.

7. Claim 51, essentially repeats all of the features listed in claim 8 of U.S. Patent No. 6,708,237. With the exception that claim 51 of the instant application recites a system and claim 8 of U.S. Patent No. 6,330,625 recites a method.

8. Claims 52-59 are identical to claims 9-16 of U.S. Patent No. 6,708,237.
